

PROJECT ON POLICY AND PAYMENT FOR ECOSYSTEM SERVICES IN ACEH (3PESA)

Discussion and meeting with COMMITTEES members
and RUPES team
7 July 2010

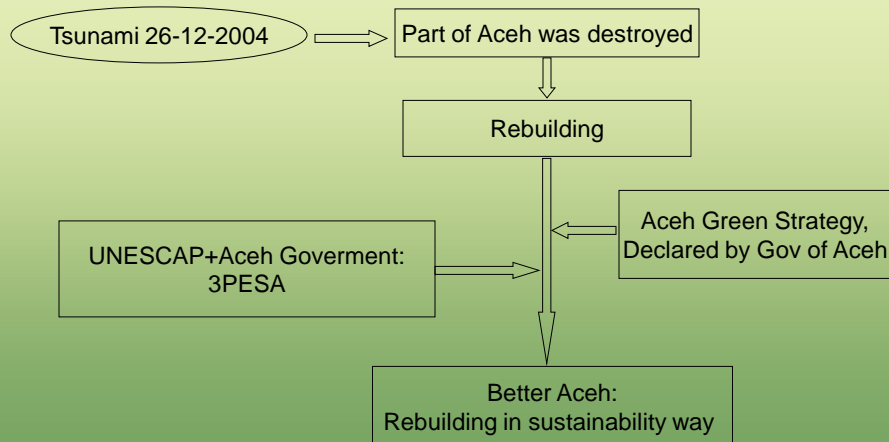

Enabling Condition of PES development in Aceh

- Special Autonomy (LOGA)
 - Provides high level of autonomy over land classification and NR management
- Moratorium on logging of natural forests
 - Reduction in deforestation
 - Redesign of forest management sector
 - Reforestation
- Post-conflict and post-tsunami reconstruction
 - Information access greatly improved
 - Reconstruction assistance can support poverty reduction

Rebuilding Aceh based on the Aceh Green Strategy

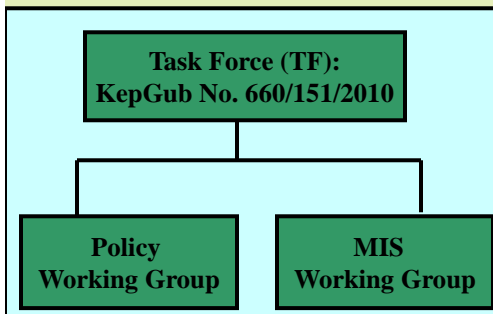

Project on Pilot For PES in Aceh (3PESA)

- Develop a working strategy on ecosystem services and PES, in support of the Aceh Green Vision
- Develop a draft policy and regulations to support PES mechanisms
- Design and implement a pilot PES scheme as a basis for testing the policy and regulations
- Evaluate, review and revise the ES strategy and PES Policy and regulations, based on the pilot project experience
- Share project experiences with other regional countries

Project Activities

- Establishing the PES Task Force and working groups
- Develop a draft policy and regulations to support PES mechanisms
- Conduct the PES valuation study in two pilot sites (in partnership with LP3ES)
- Design and implement PES mechanism in two pilot sites
- Conduct a comparative study for capacity building of 3PESA partners and stakeholders

Structure TF & WG in 3PESA

PES Policy Development

1. Develop a draft of Provincial regulation (Qanun) on PES
2. Develop a draft of Academic paper on PES

Sub-activities:

- FGD with government institutions
- FGD with Academic and public figures
- FGD with civil Society Organizations
- PES policy WG discussion

-Next steps:

- Public Consultation
- Media announcement
- Government buy-in
- Parliament

3PESA Pilot Sites:

Aceh watershed located in
Greater Aceh district and

Peusangan Watershed
located in five districts

SWP DAS PEUSANGAN

WWF Aceh Program Implement the PES in Peusangan Watershed

Conducted RHA in Peusangan
In collaboration with RUPES –
ICRAF

Signed MoU between 5 districts
Governments for watershed
Integrated management

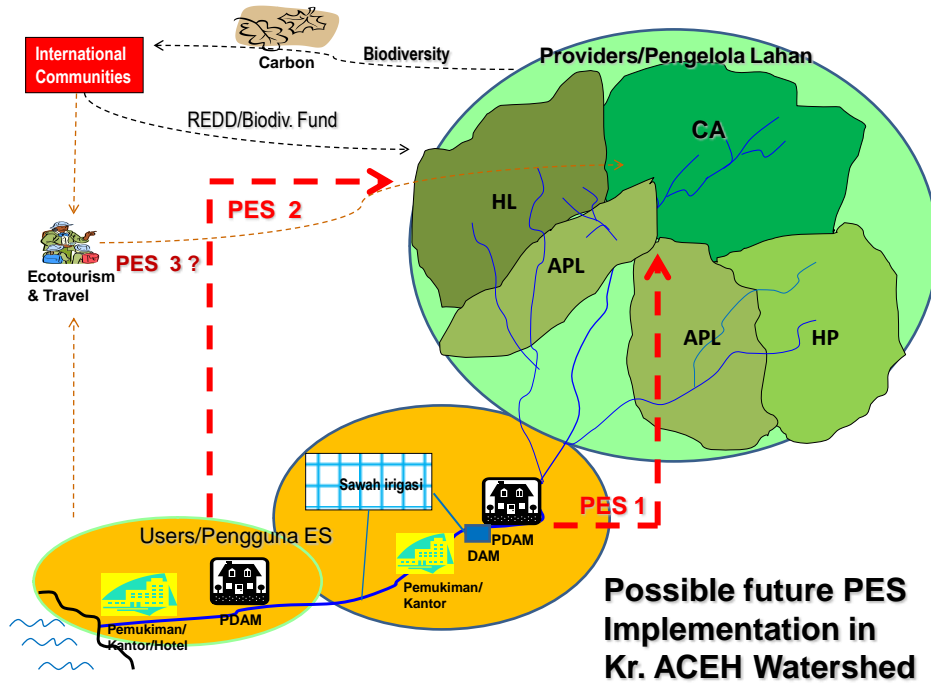

Kr. Aceh Site

DAS Priority I,
2 Districts/City: Aceh Besar &
Banda Aceh

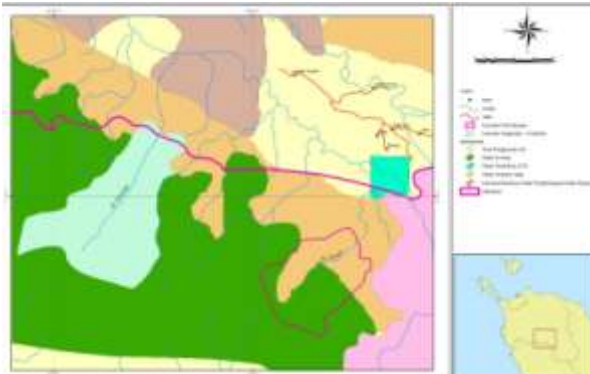

Water Resource of 2 PDAM:
Tirta Montala & Tirta Daroy

Water Resource of
Community Forums

FORPELA

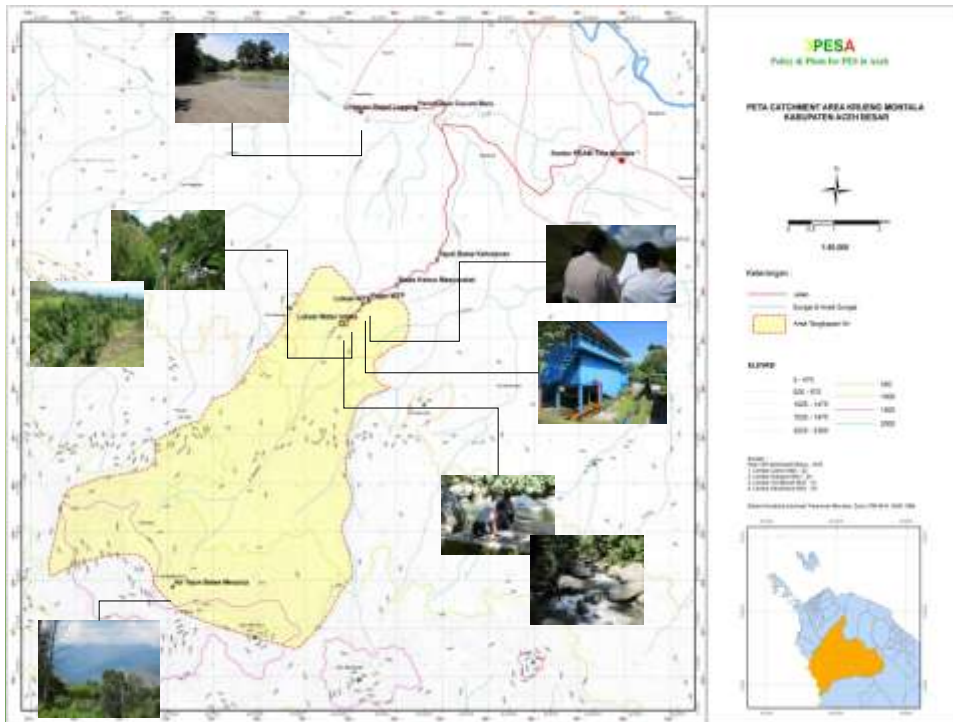

Community forum of Krueng Montala watershed Protection

Community agreement for Montala river monitoring and protection

Develop the PES contract between Montala Water company and community forum

3PESA
Policy & Pilots for PES in Aceh

Comparative study in Lombok, West Nusa Tenggara

Sub - Activities:

- Meeting with Lombok district leader;
- Meeting with Mataram Water company
- Meeting with Lombok Barat Forestry Department
- Discuss with PES Management body (IMP)
- Discuss with community
- Field trip to PES project site

Lessons Learned From Lombok study trip

- Existing Local Regulation (Perda) No. 4/2007 on Ecosystem Services Management
- 75 % of ES fund is allocated for conservation and economy development of poor community, and 25% for management operation (government).
- ES program managed by Multi-stakeholder Institution (IMP)
- Willingness to pay

PES implementation in Aceh Advantages and Disadvantages:

- Water utility buy in
- strong support from BAPEDAL
- Institutional building – what role for PES institution
- Socialisation - project buy in
- Many priorities
- Time constraints
